

## Ralls County Health Department Community Lab Screening Specials – 2026

The Ralls County Health Department is offering **low-cost lab screenings** to promote early detection, prevention, and overall community health. Please share with clients, patients, and community members.

-  These are cash prices only. Insurance cannot be billed for these screenings.
-  No doctor's orders needed.
-  No appointment needed.
-  Prices are only good for the month advertised.

### **February – \$50 Heart Health Screening**

- **BNP (B-type Natriuretic Peptide)**  
Assesses heart function by measuring BNP levels, which rise when the heart is under stress or working harder to pump blood.
- **hsCRP (High-sensitivity C-Reactive Protein)**  
Measures inflammation in the body to help assess cardiovascular disease risk, even in individuals without symptoms.

### **May – \$25 Women's Health Screening**

- **Vitamin B12**  
Screens for vitamin B12 deficiency, which can cause neurological and blood-related disorders.
- **Vitamin D**  
Evaluates vitamin D levels to support bone health and overall well-being.

### **June – \$25 Men's Health Screening**

- **PSA Free & Total**  
Screens for prostate conditions, including prostate cancer.
- **Testosterone**  
Measures testosterone levels, a hormone essential for many bodily functions.

### **November – \$20 Pancreatic Cancer Awareness Screening**

- **CA-125**  
Used to monitor certain cancers and screen for ovarian cancer in individuals at high risk.

### **December – \$20 HIV Awareness Screening**

- **Blood Typing (ABO & Rh)**  
Determines blood type and Rh factor.
- **HIV Test**  
Screens to determine if a person has been infected with HIV.
